Journal of Testing and Evaluation
Subject Index
Volume 23, 1995

A

Accelerated adhesion test
Development of a new accelerated adhesion test for silicone sealants (Cerra, AP), Sept., 370

Adhesion
Development of a new accelerated adhesion test for silicone sealants (Cerra, AP), Sept., 370

Adhesive joint
Torsional fatigue test for adhesive bonded butt joints (Prakash, V, Chen, CM, Engelhard, CA, and Powell, G), May, 228

Adhesives
Metal surface preparation by plasma-polymerized films (Van Ooij, WJ, Sabata, A, Zeik, DB, Taylor, CE, Boerio, FJ, and Clarson, SJ), Jan., 33
Torsional fatigue test for adhesive bonded butt joints (Prakash, V, Chen, CM, Engelhard, CA, and Powell, G), May, 228

Aggregate
Characterization of base/subbase materials under repetitive loading (Chen, D-H, Zaman, MM, and Laguros, JG), May, 180

Air-scattered neutrons
Study of the variation of neutron skyshine dose with respect to roof thickness, source spectrum distribution (Prabhakara, Rao, G and Sarkar, PK), Sept., 388

Aluminum
Fatigue strength of adhesive bonded aluminum joints (Liniecki, A, Hsu, TR, and Li, W), Nov., 453

Aluminum matrix
Analysis of the coherence of published data on aluminum matrix composites (Eliasson, J and Sandström, R), July, 288

Asphalt concrete
Evaluation of the Hall effect sensor for pavement instrumentation (Sebaaly, PE, Tabatabaee, N, and Kulakowski, B), May, 189

Asphalt mixes
Specimen size effects on the diametrical mechanicsl testing of cylindrical asphalt mixes (Lim, C-T, Tan, S-A, and Fwa, T-F), Nov., 436

ASTM Test Method C 621
Evaluation of the corrosion of $MoSi_2$ by molten glass (Sundaram, SK and Speyer, RF), May, 217

Austempered ductile cast iron (ADI)
Fracture toughness of unalloyed austempered ductile cast iron (ADI) (Putatunda, SK and Singh, I), Sept., 325

Austenitic
Assessment of the corrosion behavior of SS 304L in nitric acid environments—an alternative approach (Kain, V, Prasad, RC, De, PK, and Gadiyar, HS), Jan., 50

B

Banding
Dynamic fracture toughness (DFT) of banded HSLA steels (Shanmugam, P, Jana, B, and Pathak, SD), Jan., 11

Biaxial stress
Two parameters characterizing superficial mechanical features (Li, J, Gai, X, Kang, Z, and Wang, Z), Jan., 59

Biaxial testing
Universal panel tester (Hsu, TTC, Belarbi, A, and Pang, X), Jan., 41

Bimaterial "sandwich" specimen
Elastic compliance of four-point bend specimens comprising two linear-eleastic materials bonded with a thin layer (McNaney, JM, Cannon, RM, and Ritchie, RO), March, 95

Bonded joints
Fatigue strength of adhesive bonded aluminum joints (Liniecki, A, Hsu, TR, and Li, W), Nov., 453

Book reviews
Composite Materials: Engineering and Science by Matthews and Rawlings (Vahradian, HM), July, 323
Concrete: Structure, Properties, and Materials by Mehta and Monteiro (Volkman, DE), Jan., 67
Design Against Fire: An Introduction to Fire Safety Engineering Design by Stollard and Johnston (Fowell, AJ), July, 322
Design, Construction and Monitoring of Landfills, Second Edition (Kayyal, MK), Nov., 469
Engineering Materials Technology: Structure, Processing, Properties & Selection, Second Edition by Jacobs and Kilduff (Laird, G), Sept., 397
Handbook of Composite Reinforcements by Lee (Shehata, IH), May, 238
Mullite and Mullite Ceramics by Schneider et al. (Munro, RG), July, 322
Pavement Management for Airports, Roads, and Parking Lots by Shahin (Marpet, MI), Sept., 393
Synthetic Diamond: Emerging CVD Science and Technology by Spear and Dismukes (Phelps, AW), March, 145

Boundary element analyses
Reversing direct current potential drop system for detecting and sizing fatigue cracks along weld toes (Yee, R and Lambert, SB), July, 254

Brittle materials
Strength testing of brittle materials in tubular form using elastomeric inserts (Vandeput, FR), July, 261

Building seals and sealants
Development of a new accelerated adhesion test for silicone sealants (Cerra, AP), Sept., 370

Burst testing
Strength testing of brittle materials in tubular form using elastomeric inserts (Vandeput, FR), July, 261

Butt joint
Torsional fatigue test for adhesive bonded butt joints (Prakash, V, Chen, CM, Engelhard, CA, and Powell, G), May, 228

© 1995 by the American Society for Testing and Materials

C

Calcium silicate hydrate
Optimization of lime content for fly ash (Sivapullaiah, PC, Prashanth, JP, and Sridharan, A), May, 222

Calibration
Full field DC potential drop calibration for an asymmetrically cracked M(T) specimen (McKeighan, PC, Zhu, W-X, and Smith, DJ), March, 102

Cast iron
Effect of cooling rate variables on the solidification time and microstructure of permanent mold magnesium-treated iron castings (Narendranath, CS and Srinivasan, MN), July, 281
Fracture toughness of unalloyed austempered ductile cast iron (ADI) (Putatunda, SK and Singh, I), Sept., 325

Cement stabilization/solidification (CSS)
Monitoring of cement stabilized surrogate waste using resonant frequency techniques (Mirizzi, SA, Baseheart, TM, Reiser, LA, and Kramer, TE), March, 130

Ceramics
Indentation characterization of silicon nitride (Bolse, W and Peteves, SD), Jan., 27
Material specifications of advanced ceramics in corrosion studies (Munro, RG), Sept., 384
New technique for fracture characterization of ceramics at room and high temperature (Pastor, JY, Planas, J, and Elices, M), May, 209

Characterization
Characterizing shock absorbers for ground vehicle simulation (Whelan, AE), July, 307

Chemical compositions
Material specifications of advanced ceramics in corrosion studies (Munro, RG), Sept., 384

Chipboard
Prediction of creep properties of chipboard used in stressed-skin panels (Kliger, IR and Pellicane, PJ), Nov., 408

Circular plate
Modified miniature disk test for determining material mechanical properties (Xu, Y and Zhao, Z), July, 300

Clays
Quantitative X-ray diffraction technique for analyzing sedimentary rocks and soils (Burnett, AD), March, 111

Cleaning
TOFSIMS studies of cleaning procedures and silane surface treatments of steels (Sabata, A, Knueppel, BA, and van Ooij, WJ), March, 119

Coating thickness
Effect of carbide and oxide coating thickness on cutting tool wear in the turning process (Kim, J-D), July, 311

Cold-bending
Effect of cold-bending and strain-age-embrittlement on the fracture behavior of CSA G40.21 M 350 WT steel (Bhuyan, GS), May, 235

Compaction
Analysis of hot mix asphalt mat density measurements (Parker, F and Hossain, MS), Nov., 415

Compliance methods
Elastic compliance of four-point bend specimens comprising two linear-eleastic materials bonded with a thin layer (McNaney, JM, Cannon, RM, and Ritchie, RO), March, 95

Composites
Analysis of the coherence of published data on aluminum matrix composites (Eliasson, J and Sandström, R), July, 288
Influence of embedded markers on the response of the host material (Ochi, SCU, Accorsi, ML, and Jordan, EH), May, 196

Computer-aided engineering (CAE)
Durability design process of a vehicle suspension component (Lee, Y-L, Raymond, MN, and Villaire, MA), Sept., 354

Concrete
Servo-control system for the universal panel tester (Hsu, TTC, Zang, L-X, and Gomez, T), Nov., 424
Universal panel tester (Hsu, TTC, Belarbi, A, and Pang, X), Jan., 41

Construction
Analysis of hot mix asphalt mat density measurements (Parker, F and Hossain, MS), Nov., 415

Corrosion
Development of a novel specimen geometry for fatigue testing of fine wire (Schmidt, PA, Blair, RR, and Earthman, JC), March, 73
Material specifications of advanced ceramics in corrosion studies (Munro, RG), Sept., 384

Crack asymmetry
Full field DC potential drop calibration for an asymmetrically cracked M(T) specimen (McKeighan, PC, Zhu, W-X, and Smith, DJ), March, 102

Crack density
Microcracks: the hazard function and reliability inspection (Lawson, L and Chen, EY), July, 315

Crack growth
Calibration of DC potential technique using an optical image processing system in LCF testing (Merah, N, Bui-Quoc, T, and Bernard, M), May, 160
Ultra-high-vacuum chamber for environmental-fatigue testing (Ruiz, J and Elices, M), July, 275

Crack length errors
Full field DC potential drop calibration for an asymmetrically cracked M(T) specimen (McKeighan, PC, Zhu, W-X, and Smith, DJ), March, 102

Crack-length monitoring
Elastic compliance of four-point bend specimens comprising two linear-eleastic materials bonded with a thin layer (McNaney, JM, Cannon, RM, and Ritchie, RO), March, 95

Crack propagation
Consideration of evaluation of fatigue crack propagation rate from effective stress intensity factor range (Makabe, C, Kaneshiro, H, Nishida, S, and Sakihama, H), May, 153

Creep
Creep, shrinkage, and mortars in historic preservation (Sickels Taves, LB), Nov., 447
Elastic strain, creep, and recovery in mortars: additional analysis (Sickels Taves, LB), Sept., 377

Creep properties
Prediction of creep properties of chipboard used in stressed-skin panels (Kliger, IR and Pellicane, PJ), Nov., 408

Critical plane
Durability design process of a vehicle suspension component (Lee, Y-L, Raymond, MN, and Villaire, MA), Sept., 354

Cyclic loading
Deformation and fatigue behavior of vanadium-based microalloyed forging steel in the as-forged and Q&T conditions (Yang, L and Fatemi, A), March, 80

D

DC potential technique
Calibration of DC potential technique using an optical image processing system

in LCF testing (Merah, N, Bui-Quoc, T, and Bernard, M), May, 160

Deformation
Deformation and fatigue behavior of vanadium-based microalloyed forging steel in the as-forged and Q&T conditions (Yang, L and Fatemi, A), March, 80
Universal panel tester (Hsu, TTC, Belarbi, A, and Pang, X), Jan., 41

Deformation control
Servo-control system for the universal panel tester (Hsu, TTC, Zang, L-X, and Gomez, T), Nov., 424

Differential thermal analysis (DTA)
Differential thermal analysis of solid zirconium (Zhu, YT, Gao, YP, Devletian, JH, and Manthiram, A), Nov., 431
On the nonuniform distributions of temperature and thermal stress in DTA testing (Zhu, YT, Devletian, JH, Chen, SJ, and Manthiram, A), Jan., 63

Direct current potential drop method (DCPD)
Reversing direct current potential drop system for detecting and sizing fatigue cracks along weld toes (Yee, R and Lambert, SB), July, 254

Disk bend
Fracture toughness by small punch testing (Foulds, JR, Woytowitz, JP, Parnell, TK, and Jewett, CW), Jan., 3

Durability (metallic)
Durability design process of a vehicle suspension component (Lee, Y-L, Raymond, MN, and Villaire, MA), Sept., 354

Dynamic fracture
Compact testing system for dynamic fracture studies (Marur, PR, Simha, KRY, and Nair, PS), July, 267

Dynamic stiffness
Development of a dynamic load-deflection apparatus for elastomeric materials (Vallee, GE and Shukla, A), Sept., 347

E

Effective stress
Two parameters characterizing superficial mechanical features (Li, J, Gai, X, Kang, Z, and Wang, Z), Jan., 59

Effective stress intensity factor range
Consideration of evaluation of fatigue crack propagation rate from effective stress intensity factor range (Makabe, C, Kaneshiro, H, Nishida, S, and Sakihama, H), May, 153

Elastic modulus
Evaluation of three methods to measure the dynamic elastic modulus of steel (Wolfenden, A and Schwanz, WR), May, 176

Elastic-plastic bulge deformation
Modified miniature disk test for determining material mechanical properties (Xu, Y and Zhao, Z), July, 300

Elastic recovery
Relationship between tensile stress relaxation behavior and short-term elastic recovery for linear low-density polyethylenes (Porzucek, K and Lefebvre, M), May, 203

Elastic strain
Elastic strain, creep, and recovery in mortars: additional analysis (Sickels Taves, LB), Sept., 377

Elastomers
Development of a dynamic load-deflection apparatus for elastomeric materials (Vallee, GE and Shukla, A), Sept., 347

Elevated temperature
Dynamic strain aging in a new single crystal nickel-based superalloy (CMSX-4) (Sengupta, A and Putatunda, SK), March, 87

Embedded markers
Influence of embedded markers on the response of the host material (Ochi, SCU, Accorsi, ML, and Jordan, EH), May, 196

Environmental
Ultra-high-vacuum chamber for environmental-fatigue testing (Ruiz, J and Elices, M), July, 275

Ethylene
Metal surface preparation by plasma-polymerized films (Van Ooij, WJ, Sabata, A, Zeik, DB, Taylor, CE, Boerio, FJ, and Clarson, SJ), Jan., 33

F

Fatigue
Calibration of DC potential technique using an optical image processing system in LCF testing (Merah, N, Bui-Quoc, T, and Bernard, M), May, 160
Consideration of evaluation of fatigue crack propagation rate from effective stress intensity factor range (Makabe, C, Kaneshiro, H, Nishida, S, and Sakihama, H), May, 153
Development of a novel specimen geometry for fatigue testing of fine wire (Schmidt, PA, Blair, RR, and Earthman, JC), March, 73
Durability design process of a vehicle suspension component (Lee, Y-L, Raymond, MN, and Villaire, MA), Sept., 354
Fatigue strength of adhesive bonded aluminum joints (Liniecki, A, Hsu, TR, and Li, W), Nov., 453
Method for generating fatigue marker bands using a constant K_{max} test procedure (Ragazzo, C, Hertzberg, RW, and Jaccard, R), Jan., 19
Microcracks: the hazard function and reliability inspection (Lawson, L and Chen, EY), July, 315
Reversing direct current potential drop system for detecting and sizing fatigue cracks along weld toes (Yee, R and Lambert, SB), July, 254
Study of the fatigue softening and hardening of steel by the magnetoelastic effect method (Mu, X, Ma, X, and Zhuang, Y), March, 126
Torsional fatigue test for adhesive bonded butt joints (Prakash, V, Chen, CM, Engelhard, CA, and Powell, G), May, 228
Ultra-high-vacuum chamber for environmental-fatigue testing (Ruiz, J and Elices, M), July, 275

Fatigue marker bands
Method for generating fatigue marker bands using a constant K_{max} test procedure (Ragazzo, C, Hertzberg, RW, and Jaccard, R), Jan., 19

Fatigue testing
Development of a novel specimen geometry for fatigue testing of fine wire (Schmidt, PA, Blair, RR, and Earthman, JC), March, 73

Female condoms
Water leak testing of polyurethane female condoms (Neunaber, LM, Boivin, WS, Khatri, ZH, and Herman, BA), Nov., 442

Finger joint
Comparison of optically and mechanically measured deformations in a finger-jointed wood tension specimen (Pellicane, PJ, Gutkowski, MR, and Jauslin, C), March, 136

Finishing
Effects of finishing treatments on fabric friction (Ajayi, JO and Elder, HM), Jan., 55

Finite element stress analysis
Mixed mode stress intensity calibrations for an angled crack bend specimen (Yates, JR, Ho, KF, and Goldthorpe, MR), Sept., 341

Flexible barrier materials
Water leak testing of polyurethane female condoms (Neunaber, LM, Boivin, WS, Khatri, ZH, and Herman, BA), Nov., 442

Flexible pavement
Evaluation of the hall effect sensor for pavement instrumentation (Sebaaly, PE, Tabatabaee, N, and Kulakowski, B), May, 189

Flexural modulus
Evaluation of three methods to measure the dynamic elastic modulus of steel (Wolfenden, A and Schwanz, WR), May, 176

Fly ash
Optimization of lime content for fly ash (Sivapullaiah, PC, Prashanth, JP, and Sridharan, A), May, 222

Foil analogue method
Reversing direct current potential drop system for detecting and sizing fatigue cracks along weld toes (Yee, R and Lambert, SB), July, 254

Fracture mechanics
Compact testing system for dynamic fracture studies (Marur, PR, Simha, KRY, and Nair, PS), July, 267
Crack initiation fracture toughness of transmission line hardware steels (Bhuyan, GS), May, 231
Effect of cold-bending and strain-age-embrittlement on the fracture behavior of CSA G40.21 M 350 WT steel (Bhuyan, GS), May, 235
Full field DC potential drop calibration for an asymmetrically cracked M(T) specimen (McKeighan, PC, Zhu, W-X, and Smith, DJ), March, 102
Mixed mode stress intensity calibrations for an angled crack bend specimen (Yates, JR, Ho, KF, and Goldthorpe, MR), Sept., 341
Strength testing of brittle materials in tubular form using elastomeric inserts (Vandeput, FR), July, 261
Two parameters characterizing superficial mechanical features (Li, J, Gai, X, Kang, Z, and Wang, Z), Jan., 59

Fracture micromechanisms
Method for generating fatigue marker bands using a constant K_{max} test procedure (Ragazzo, C, Hertzberg, RW, and Jaccard, R), Jan., 19

Fracture testing
Fracture toughness by small punch testing (Foulds, JR, Woytowitz, JP, Parnell, TK, and Jewett, CW), Jan., 3

Fracture toughness
Dynamic fracture toughness (DFT) of banded HSLA steels (Shanmugam, P, Jana, B, and Pathak, SD), Jan., 11
Fracture toughness by small punch testing (Foulds, JR, Woytowitz, JP, Parnell, TK, and Jewett, CW), Jan., 3
Fracture toughness of unalloyed austempered ductile cast iron (ADI) (Putatunda, SK and Singh, I), Sept., 325

Free swell
Optimization of lime content for fly ash (Sivapullaiah, PC, Prashanth, JP, and Sridharan, A), May, 222

Friction
Effects of finishing treatments on fabric friction (Ajayi, JO and Elder, HM), Jan., 55

G

Galvanizing
Effect of cold-bending and strain-age-embrittlement on the fracture behavior of CSA G40.21 M 350 WT steel (Bhuyan, GS), May, 235

Granular materials
Characterization of base/subbase materials under repetitive loading (Chen, D-H, Zaman, MM, and Laguros, JG), May, 180

Ground vehicle simulation
Characterizing shock absorbers for ground vehicle simulation (Whelan, AE), July, 307

H

Handle
Effects of finishing treatments on fabric friction (Ajayi, JO and Elder, HM), Jan., 55

Hazard function
Microcracks: the hazard function and reliability inspection (Lawson, L and Chen, EY), July, 315

Hexamethyldisiloxane
Metal surface preparation by plasma-polymerized films (Van Ooij, WJ, Sabata, A, Zeik, DB, Taylor, CE, Boerio, FJ and Clarson, SJ), Jan., 33

High strength concretes
Servo-control system for the universal panel tester (Hsu, TTC, Zang, L-X, and Gomez, T), Nov., 424

High strength low alloy (HSLA) steel
Dynamic fracture toughness (DFT) of banded HSLA steels (Shanmugam, P, Jana, B, and Pathak, SD), Jan., 11

High temperatures
Calibration of DC potential technique using an optical image processing system in LCF testing (Merah, N, Bui-Quoc, T, and Bernard, M), May, 160
New technique for fracture characterization of ceramics at room and high temperature (Pastor, JY, Planas, J, and Elices, M), May, 209

High vacuum
Ultra-high-vacuum chamber for environmental-fatigue testing (Ruiz, J and Elices, M), July, 275

Historic preservation
Creep, shrinkage, and mortars in historic preservation (Sickels Taves, LB), Nov., 447

Host material
Influence of embedded markers on the response of the host material (Ochi, SCU, Accorsi, ML, and Jordan, EH), May, 196

Hot mix asphalt
Analysis of hot mix asphalt mat density measurements (Parker, F and Hossain, MS), Nov., 415

I

Impact absorber
Development of a dynamic load-deflection apparatus for elastomeric materials (Vallee, GE and Shukla, A), Sept., 347

Impact wear
Repetitive- and single-blow impact testing of wear-resistant alloys (Laird, G, II), Sept., 333

Indentation response
Indentation characterization of silicon nitride (Bolse, W and Peteves, SD), Jan., 27

Initiation
Microcracks: the hazard function and reliability inspection (Lawson, L and Chen, EY), July, 315

Initiation fracture toughness
Crack initiation fracture toughness of transmission line hardware steels (Bhuyan, GS), May, 231

Inorganic coatings
Stiffening effects of photoelastic coatings on orthotropic plates (Tew, BW, Blackketter, DM, and Lemmon, RK), July, 319

Instrumented impact
Compact testing system for dynamic fracture studies (Marur, PR, Simha, KRY, and Nair, PS), July, 267

Intergranular corrosion
Assessment of the corrosion behavior of SS 304L in nitric acid environments—an alternative approach (Kain, V, Prasad, RC, De, PK, and Gadiyar, HS), Jan., 50

Interlaboratory testing
Structure and outliers in interlaboratory studies (Mandel, J), Sept., 364

Iron castings
Effect of cooling rate variables on the solidification time and microstructure of permanent mold magnesium-treated iron castings (Narendranath, CS and Srinivasan, MN), July, 281
Fracture toughness of unalloyed austempered ductile cast iron (ADI) (Putatunda, SK and Singh, I), Sept., 325

L

Leakage tests
Water leak testing of polyurethane female condoms (Neunaber, LM, Boivin, WS, Khatri, ZH, and Herman, BA), Nov., 442

Letter to the editor
Letter to the editor (Wehrstedt, A and Heberling, TG), Nov., 405

Lime
Optimization of lime content for fly ash (Sivapullaiah, PC, Prashanth, JP, and Sridharan, A), May, 222

Linear elastic fracture mechanics
Mixed mode stress intensity calibrations for an angled crack bend specimen (Yates, JR, Ho, KF, and Goldthorpe, MR), Sept., 341

Linear low-density polyethylenes
Relationship between tensile stress relaxation behavior and short-term elastic recovery for linear low-density polyethylenes (Porzucek, K and Lefebvre, M), May, 203

Liquid helium
Relationships between specimen size, stress rate, and load-controlled tensile properties of AISI 300 series stainless steels at 4 K (Lee HM, Moon, H, and Pyun, S-L), May, 168

Load control
Relationships between specimen size, stress rate, and load-controlled tensile properties of AISI 300 series stainless steels at 4 K (Lee HM, Moon, H, and Pyun, S-L), May, 168
Servo-control system for the universal panel tester (Hsu, TTC, Zang, L-X, and Gomez, T), Nov., 424

Loading
Fatigue strength of adhesive bonded aluminum joints (Liniecki, A, Hsu, TR, and Li, W), Nov., 453

Low cycle
Calibration of DC potential technique using an optical image processing system in LCF testing (Merah, N, Bui-Quoc, T, and Bernard, M), May, 160

M

Magnetic anisotropy
Study of the fatigue softening and hardening of steel by the magnetoelastic effect method (Mu, X, Ma, X, and Zhuang, Y), March, 126

Magnetoelastic effect
Study of the fatigue softening and hardening of steel by the magnetoelastic effect method (Mu, X, Ma, X, and Zhuang, Y), March, 126

Mechanical properties
Dynamic strain aging in a new single crystal nickel-based superalloy (CMSX-4) (Sengupta, A and Putatunda, SK), March, 87
Elastic compliance of four-point bend specimens comprising two linear-eleastic materials bonded with a thin layer (McNaney, JM, Cannon, RM, and Ritchie, RO), March, 95
Evaluation of three methods to measure the dynamic elastic modulus of steel (Wolfenden, A and Schwanz, WR), May, 176
Modified miniature disk test for determining material mechanical properties (Xu, Y and Zhao, Z), July, 300
Prediction of creep properties of chipboard used in stressed-skin panels (Kliger, IR and Pellicane, PJ), Nov., 408
Vibration-based method for determining St. Venant torsional and warping stiffness of members with open cross-sections (Li, D-B, Chui, YH, and Smith, I), March, 141

Mechanical property identification
Vibration-based method for determining St. Venant torsional and warping stiffness of members with open cross-sections (Li, D-B, Chui, YH, and Smith, I), March, 141

Mechanical testing
Development of a dynamic load-deflection apparatus for elastomeric materials (Vallee, GE and Shukla, A), Sept., 347
Relationships between specimen size, stress rate, and load-controlled tensile properties of AISI 300 series stainless steels at 4 K (Lee HM, Moon, H, and Pyun, S-L), May, 168
Specimen size effects on the diametrical mechanicsl testing of cylindrical asphalt mixes (Lim, C-T, Tan, S-A, and Fwa, T-F), Nov., 436

Meta data
Analysis of the coherence of published data on aluminum matrix composites (Eliasson, J and Sandström, R), July, 288

Metallic coatings
Effect of carbide and oxide coating thickness on cutting tool wear in the turning process (Kim, J-D), July, 311

Metals
Development of a novel specimen geometry for fatigue testing of fine wire (Schmidt, PA, Blair, RR, and Earthman, JC), March, 73
Metal surface preparation by plasma-polymerized films (Van Ooij, WJ, Sabata, A, Zeik, DB, Taylor, CE, Boerio, FJ and Clarson, SJ), Jan., 33

Microalloyed steel
Deformation and fatigue behavior of vanadium-based microalloyed forging steel in the as-forged and Q&T conditions (Yang, L and Fatemi, A), March, 80

Microcracks
Microcracks: the hazard function and reliability inspection (Lawson, L and Chen, EY), July, 315

Microhardness
Indentation characterization of silicon nitride (Bolse, W and Peteves, SD), Jan., 27

Minerology
Quantitative X-ray diffraction technique for analyzing sedimentary rocks and soils (Burnett, AD), March, 111

Mises yielding criterion
Two parameters characterizing superficial mechanical features (Li, J, Gai, X, Kang, Z, and Wang, Z), Jan., 59

Mixed mode stress intensity factors
Mixed mode stress intensity calibrations for an angled crack bend specimen (Yates, JR, Ho, KF, and Goldthorpe, MR), Sept., 341

Modifications
Evaluation of the corrosion of $MoSi_2$ by molten glass (Sundaram, SK and Speyer, RF), May, 217

Modified miniature specimen test (MMST)
Modified miniature disk test for determining material mechanical properties (Xu, Y and Zhao, Z), July, 300

Molybdenum disilicide
Evaluation of the corrosion of $MoSi_2$ by molten glass (Sundaram, SK and Speyer, RF), May, 217

Monotonic loading
Deformation and fatigue behavior of vanadium-based microalloyed forging steel in the as-forged and Q&T conditions (Yang, L and Fatemi, A), March, 80

Mortars
Creep, shrinkage, and mortars in historic preservation (Sickels Taves, LB), Nov., 447
Elastic strain, creep, and recovery in mortars: additional analysis (Sickels Taves, LB), Sept., 377

N

Neutrons skyshine dose
Study of the variation of neutron skyshine dose with respect to roof thickness, source spectrum distribution (Prabhakara, Rao, G and Sarkar, PK), Sept., 388

Nickel-based superalloy
Dynamic strain aging in a new single crystal nickel-based superalloy (CMSX-4) (Sengupta, A and Putatunda, SK), March, 87

Nitric acid
Assessment of the corrosion behavior of SS 304L in nitric acid environments—an alternative approach (Kain, V, Prasad, RC, De, PK, and Gadiyar, HS), Jan., 50

Nondestructive testing
Monitoring of cement stabilized surrogate waste using resonant frequency techniques (Mirizzi, SA, Baseheart, TM, Reiser, LA, and Kramer, TE), March, 130

O

Optical
Comparison of optically and mechanically measured deformations in a finger-jointed wood tension specimen (Pellicane, PJ, Gutkowski, MR, and Jauslin, C), March, 136

Orthotropic materials
Stiffening effects of photoelastic coatings on orthotropic plates (Tew, BW, Blackketter, DM, and Lemmon, RK), July, 319

Outliers
Structure and outliers in interlaboratory studies (Mandel, J), Sept., 364

P

Packaging
Pneumatic pressure bag testing machine for applying a uniform load to panels and pallets (Mackes, KH, Loferski, JR, and White, MS), July, 295
Relationship between tensile stress relaxation behavior and short-term elastic recovery for linear low-density polyethylenes (Porzucek, K and Lefebvre, M), May, 203

Particle size measurements
Study of the variation of neutron skyshine dose with respect to roof thickness, source spectrum distribution (Prabhakara, Rao, G and Sarkar, PK), Sept., 388

Pavement technologies
Characterization of base/subbase materials under repetitive loading (Chen, D-H, Zaman, MM, and Laguros, JG), May, 180
Evaluation of the Hall effect sensor for pavement instrumentation (Sebaaly, PE, Tabatabaee, N, and Kulakowski, B), May, 189

Permanent mold
Effect of cooling rate variables on the solidification time and microstructure of permanent mold magnesium-treated iron castings (Narendranath, CS and Srinivasan, MN), July, 281

Phase transition temperature
Differential thermal analysis of solid zirconium (Zhu, YT, Gao, YP, Devletian, JH, and Manthiram, A), Nov., 431

Photoelasticity
Stiffening effects of photoelastic coatings on orthotropic plates (Tew, BW, Blackketter, DM, and Lemmon, RK), July, 319

Plasma polymerization
Metal surface preparation by plasma-polymerized films (Van Ooij, WJ, Sabata, A, Zeik, DB, Taylor, CE, Boerio, FJ, and Clarson, SJ), Jan., 33

Pneumatic pressure bag testing machine
Pneumatic pressure bag testing machine for applying a uniform load to panels and pallets (Mackes, KH, Loferski, JR, and White, MS), July, 295

Polyurethane
Water leak testing of polyurethane female condoms (Neunaber, LM, Boivin, WS, Khatri, ZH, and Herman, BA), Nov., 442

Potential drop
Crack initiation fracture toughness of transmission line hardware steels (Bhuyan, GS), May, 231
Full field DC potential drop calibration for an asymmetrically cracked M(T) specimen (McKeighan, PC, Zhu, W-X, and Smith, DJ), March, 102

R

Recovery
Elastic strain, creep, and recovery in mortars: additional analysis (Sickels Taves, LB), Sept., 377

Refractories
Evaluation of the corrosion of $MoSi_2$ by molten glass (Sundaram, SK and Speyer, RF), May, 217

Regression
Structure and outliers in interlaboratory studies (Mandel, J), Sept., 364

Resilient modulus
Characterization of base/subbase materials under repetitive loading (Chen, D-H, Zaman, MM, and Laguros, JG), May, 180
Specimen size effects on the diametrical mechanicsl testing of cylindrical asphalt mixes (Lim, C-T, Tan, S-A, and Fwa, T-F), Nov., 436

Resistant alloys
Repetitive- and single-blow impact testing of wear-resistant alloys (Laird, G, II), Sept., 333

Resonant frequency testing
Monitoring of cement stabilized surrogate waste using resonant frequency techniques (Mirizzi, SA, Baseheart, TM, Reiser, LA, and Kramer, TE), March, 130

Road paving materials
Analysis of hot mix asphalt mat density measurements (Parker, F and Hossain, MS), Nov., 415

S

Sensitivity
Study of the variation of neutron skyshine dose with respect to roof thickness, source spectrum distribution (Prabhakara, Rao, G and Sarkar, PK), Sept., 388

Shock absorbers
Characterizing shock absorbers for ground vehicle simulation (Whelan, AE), July, 307

Shrinkage
Creep, shrinkage, and mortars in historic preservation (Sickels Taves, LB), Nov., 447

Silicon nitride
Indentation characterization of silicon nitride (Bolse, W and Peteves, SD), Jan., 27

Silicone
Development of a new accelerated adhesion test for silicone sealants (Cerra, AP), Sept., 370

Single crystal
Dynamic strain aging in a new single crystal nickel-based superalloy (CMSX-4) (Sengupta, A and Putatunda, SK), March, 87

Small punch testing
Fracture toughness by small punch testing (Foulds, JR, Woytowitz, JP, Parnell, TK, and Jewett, CW), Jan., 3

Smart material
Influence of embedded markers on the response of the host material (Ochi, SCU, Accorsi, ML, and Jordan, EH), May, 196

Soils
Quantitative X-ray diffraction technique for analyzing sedimentary rocks and soils (Burnett, AD), March, 111

Solidification
Effect of cooling rate variables on the solidification time and microstructure of permanent mold magnesium-treated iron castings (Narendranath, CS and Srinivasan, MN), July, 281

Specific fracture energy
New technique for fracture characterization of ceramics at room and high temperature (Pastor, JY, Planas, J, and Elices, M), May, 209

Specimen condition
Differential thermal analysis of solid zirconium (Zhu, YT, Gao, YP, Devletian, JH, and Manthiram, A), Nov., 431

Specimen size
Relationships between specimen size, stress rate, and load-controlled tensile properties of AISI 300 series stainless steels at 4 K (Lee HM, Moon, H, and Pyun, S-L), May, 168
Specimen size effects on the diametrical mechanicsl testing of cylindrical asphalt mixes (Lim, C-T, Tan, S-A, and Fwa, T-F), Nov., 436

St. Venant torsional stiffness
Vibration-based method for determining St. Venant torsional and warping stiffness of members with open cross-sections (Li, D-B, Chui, YH, and Smith, I), March, 141

Stable fracture tests
New technique for fracture characterization of ceramics at room and high temperature (Pastor, JY, Planas, J, and Elices, M), May, 209

Stainless steels
Assessment of the corrosion behavior of SS 304L in nitric acid environments—an alternative approach (Kain, V, Prasad, RC, De, PK, and Gadiyar, HS), Jan., 50

Statistics
Structure and outliers in interlaboratory studies (Mandel, J), Sept., 364

Steel plate
Pneumatic pressure bag testing machine for applying a uniform load to panels and pallets (Mackes, KH, Loferski, JR, and White, MS), July, 295

Steels
Deformation and fatigue behavior of vanadium-based microalloyed forging steel in the as-forged and Q&T conditions (Yang, L and Fatemi, A), March, 80
Dynamic fracture toughness (DFT) of banded HSLA steels (Shanmugam, P, Jana, B, and Pathak, SD), Jan., 11
Study of the fatigue softening and hardening of steel by the magnetoelastic effect method (Mu, X, Ma, X, and Zhuang, Y), March, 126
TOFSIMS studies of cleaning procedures and silane surface treatments of steels (Sabata, A, Knueppel, BA, and van Ooij, WJ), March, 119

Strain age embrittlement
Effect of cold-bending and strain-age-embrittlement on the fracture behavior of CSA G40.21 M 350 WT steel (Bhuyan, GS), May, 235

Strain measurement
Comparison of optically and mechanically measured deformations in a finger-jointed wood tension specimen (Pellicane, PJ, Gutkowski, MR, and Jauslin, C), March, 136

Stress analysis
Stiffening effects of photoelastic coatings on orthotropic plates (Tew, BW, Blackketter, DM, and Lemmon, RK), July, 319

Stress intensity factor
Method for generating fatigue marker bands using a constant K_{max} test procedure (Ragazzo, C, Hertzberg, RW, and Jaccard, R), Jan., 19

Stress relaxation
Relationship between tensile stress relaxation behavior and short-term elastic recovery for linear low-density polyethylenes (Porzucek, K and Lefebvre, M), May, 203

Stressed-skin panels (SSP)
Prediction of creep properties of chipboard used in stressed-skin panels (Kliger, IR and Pellicane, PJ), Nov., 408

Surface analysis
TOFSIMS studies of cleaning procedures and silane surface treatments of steels (Sabata, A, Knueppel, BA, and van Ooij, WJ), March, 119

T

Temperature measurement
On the nonuniform distributions of temperature and thermal stress in DTA testing (Zhu, YT, Devletian, JH, Chen, SJ, and Manthiram, A), Jan., 63

Tensile residual deformation
Relationship between tensile stress relaxation behavior and short-term elastic recovery for linear low-density polyethylenes (Porzucek, K and Lefebvre, M), May, 203

Tensile strain
Evaluation of the Hall effect sensor for pavement instrumentation (Sebaaly, PE, Tabatabaee, N, and Kulakowski, B), May, 189

Tension testing
Relationships between specimen size, stress rate, and load-controlled tensile properties of AISI 300 series stainless steels at 4 K (Lee HM, Moon, H, and Pyun, S-L), May, 168

Textiles
Effects of finishing treatments on fabric friction (Ajayi, JO and Elder, HM), Jan., 55

Thermal strain
On the nonuniform distributions of temperature and thermal stress in DTA testing (Zhu, YT, Devletian, JH, Chen, SJ, and Manthiram, A), Jan., 63

Thermal stress
On the nonuniform distributions of temperature and thermal stress in DTA testing (Zhu, YT, Devletian, JH, Chen, SJ, and Manthiram, A), Jan., 63

Three-point bend specimens
Compact testing system for dynamic fracture studies (Marur, PR, Simha, KRY, and Nair, PS), July, 267

Titanium carbide
Effect of carbide and oxide coating thickness on cutting tool wear in the turning process (Kim, J-D), July, 311

Tool wear
Effect of carbide and oxide coating thickness on cutting tool wear in the turning process (Kim, J-D), July, 311

Torsion
Torsional fatigue test for adhesive bonded butt joints (Prakash, V, Chen, CM, Engelhard, CA, and Powell, G), May, 228

Toughness
Repetitive- and single-blow impact testing of wear-resistant alloys (Laird, G, II), Sept., 333

Transmission hardware steels
Crack initiation fracture toughness of transmission line hardware steels (Bhuyan, GS), May, 231

Tungsten carbide
Strength testing of brittle materials in tubular form using elastomeric inserts (Vandeput, FR), July, 261

U–V

Uniformly distributed load
Pneumatic pressure bag testing machine for applying a uniform load to panels and pallets (Mackes, KH, Loferski, JR, and White, MS), July, 295

Universal panel tester
Universal panel tester (Hsu, TTC, Belarbi, A, and Pang, X), Jan., 41

Vehicle-pavement systems
Characterizing shock absorbers for ground vehicle simulation (Whelan, AE), July, 307

W

Warping stiffness
Vibration-based method for determining St. Venant torsional and warping stiffness of members with open cross-sections (Li, D-B, Chui, YH, and Smith, I), March, 141

Waste disposal
Monitoring of cement stabilized surrogate waste using resonant frequency techniques (Mirizzi, SA, Baseheart, TM, Reiser, LA, and Kramer, TE), March, 130

Wear
Repetitive- and single-blow impact testing of wear-resistant alloys (Laird, G, II), Sept., 333

White cast irons
Repetitive- and single-blow impact testing of wear-resistant alloys (Laird, G, II), Sept., 333

Wood
Comparison of optically and mechanically measured deformations in a finger-jointed wood tension specimen (Pellicane, PJ, Gutkowski, MR, and Jauslin, C), March, 136
Prediction of creep properties of chipboard used in stressed-skin panels (Kliger, IR and Pellicane, PJ), Nov., 408

X–Z

X-ray diffraction
Quantitative X-ray diffraction technique for analyzing sedimentary rocks and soils (Burnett, AD), March, 111

Young's modulus
Evaluation of three methods to measure the dynamic elastic modulus of steel (Wolfenden, A and Schwanz, WR), May, 176

Zirconium
Differential thermal analysis of solid zirconium (Zhu, YT, Gao, YP, Devletian, JH, and Manthiram, A), Nov., 431
